[How to build an activity](#)

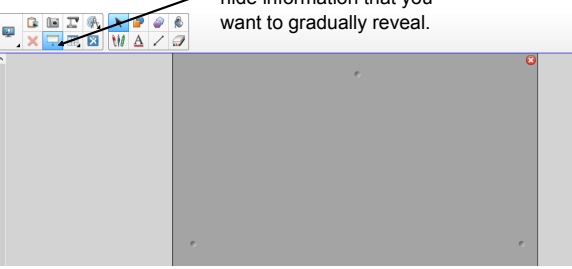

1. Select the object you want to be the activity object, and then click Edit. Diagonal lines appear on the activity object.
2. In the Objects tab, drag objects to the appropriate areas to accept or reject them.
3. In the Settings tab, set how objects behave when accepted or rejected.
4. Click Done.

You can now interact with the activity.

[More information](#)

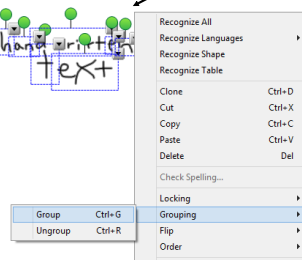

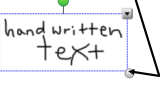

Other topics that came up during the workshops:

The shade can be used to hide information that you want to gradually reveal.

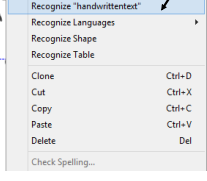

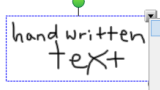

Other topics that came up during the workshops:

Hand written text can be resized by grouping it, clicking on it, and dragging the circle in the lower right corner of the text to make it bigger or smaller.

Other topics that came up during the workshops:

Right clicking on hand written text will also allow you to "Recognize" what you have written and turn it into typed out words.

hand written text

Thank you for attending the workshop!

We hope it was helpful!
